

# Video Balun Wiring Diagram

## Required Items

**CAT5 Cable**

**Video Balun**

**CCTV Camera**

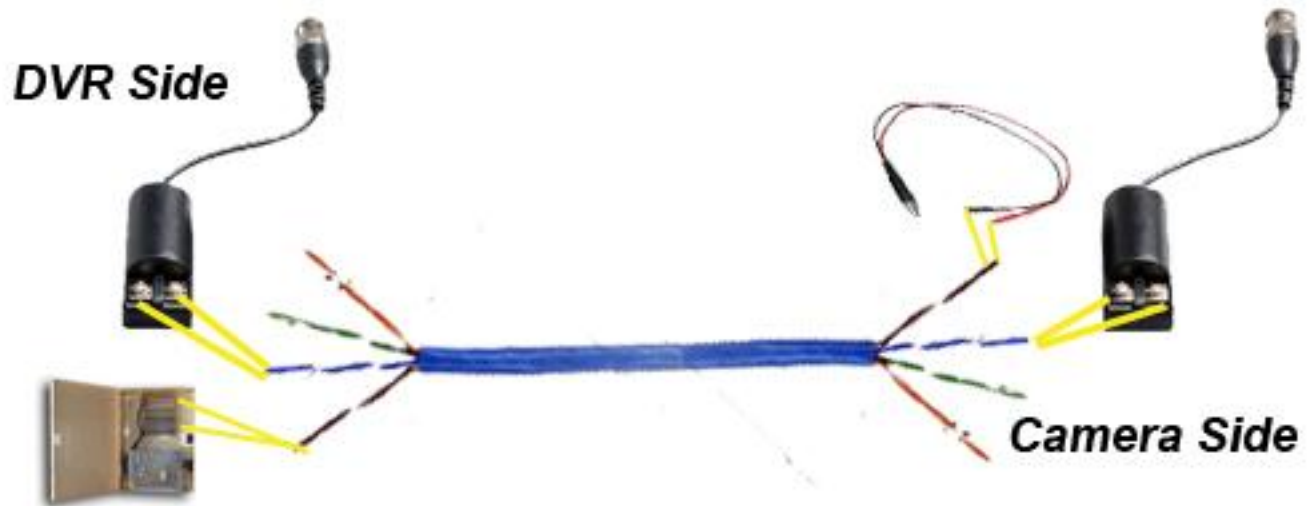

**DC Power Cord**

**Power Box**

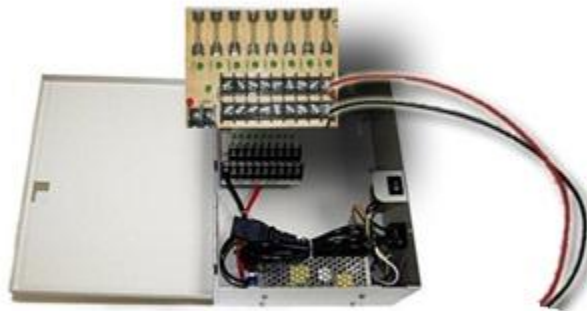

## CAT5 Cable Plug in

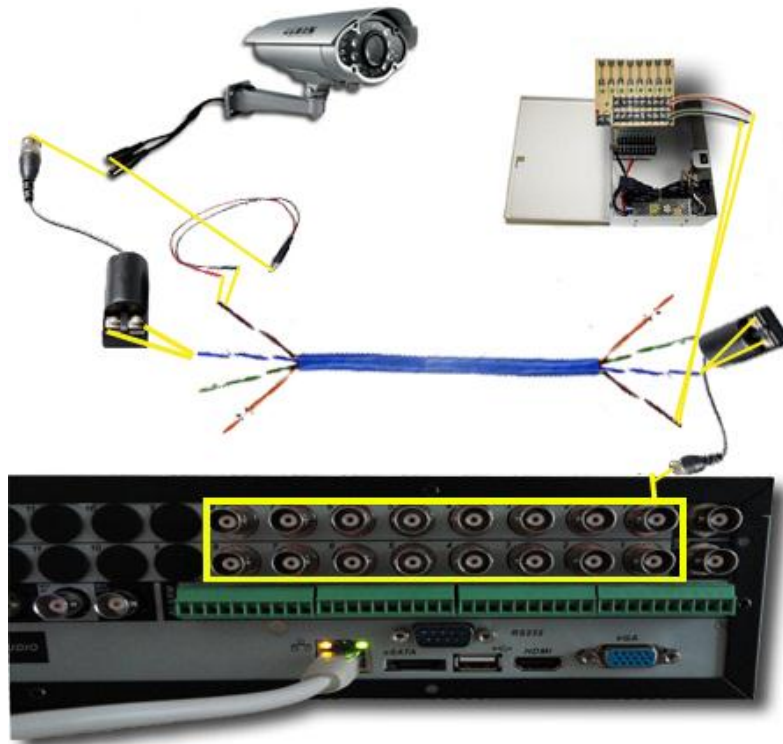

Once you have ran the cable and have the camera mounted, you must have the right fitting in the correct side. You will need to make sure the color matches on both sides + is to + and – is to - .

## Power Supply Input Screw Terminal

Please make sure that the + and the – in the power box is correct based on how you terminated it on the camera side DC cord (+ is RED – is NEGATIVE)

## Complete Connection

Once you have completed the connection between the Screw terminal Power Box and the DC cord you can now simply plug in the camera into this DC Cord. The video then goes into the BNC input in the back of the DVR.
